Learning, Growing & Giving Thanks Together

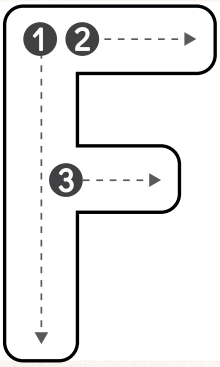

Teacher Note

October was exciting and filled with fun! In November, we'll get back into the swing of things as we introduce new material and continue reviewing what we've learned so far. Since we've already learned how to write the number 3, I highly recommend practicing it at home. The number 3 has curves that can be a little tricky for children, a little extra practice will help with that number formation.

Important Dates

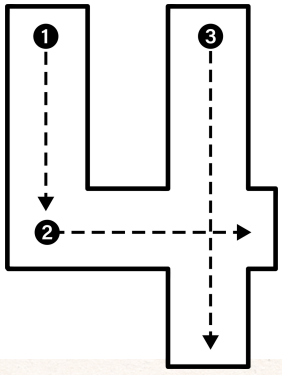

- **Nov 5** — **Library Trip**, 9 – 10 AM
- **Nov 11** — **Veteran's Day**, No School
- **Nov 18** — **Conference Day**, No School

What are we Learning ?

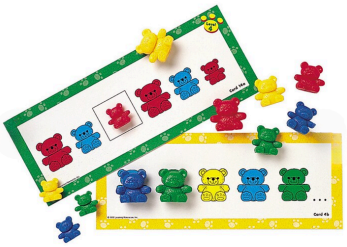

Phonics: F

We learn all about the letter F! We place our top teeth over our bottom lip and hold four fingers on our chin to feel the airflow through our front teeth as we make the /f/ sound.

Math: Number 4

Our number of the week is 4. Down and over, then down once more, that's the way we write a 4!

Math: Patterns

We learn all about patterns! How can we recognize patterns, and how can we create our own?

Theme: Fall

We continue to learn all about fall.

Science: Weather & Fall

We continue exploring Fall and the changes it brings to our environment. We'll discover how animals prepare for colder weather, what harvest season means, and how these changes affect our everyday lives.

Religion: All Saints Day

We learn all about all saints day. We will learn about saints and how they play an important role in our faith.
